Subject Please let us know when you can talk with us about 9-15 Public Information Meeting. Background documents attached.

Dear Linda:

Loren Setlow and I would like to talk to you in advance of our Public Information Meeting on the review of Uranium and Thorium milling rules on 9-15 in Tuba City. We'd like to talk to you tomorrow, September 9 if at all possible.

We'd like to get your advice on protocol and points on having a meeting on Tribal lands, and discuss the issues that came up during similar meetings held in Colorado.

An agenda is attached. During registration, participants will be asked to give us their contact information and submit any questions that they already have in advance. Speakers will be asked to sign up at this time as well. We will also allow people to submit additional questions and sign up to speak during the meeting. We will ask to you periodically remind the audience that they can submit additional questions and add their name to the list of speakers at any time. Presentations from the public will be limited to 5 minutes, which could present the biggest challenge to you as a facilitator.

We anticipate the meeting flowing as follows:

- Welcome, introductions and participation guidelines
- Presentations from EPA, followed by questions from the audience on the EPA presentations
- 5-minute presentations from members of the public
- Questions submitted from the audience

We are planning for attendance of 150 people. Depending on the number of questions and speakers, we may want to take a break from the public presentations to ask questions, and then resume the presentations. We'd appreciate your advice on this.

We do not have breaks planned, but could call them if you advise.

Attached are some background documents for your information: a list of projected questions, and a report from Uranium-Thorium public meetings held in Colorado.
